INTERNATIONAL UNIVERSITY OF HEALTH AND WELFARE

IHW Group

List of Facilities (2026.7)

Group Overview

The IHW Group traces its origins to the establishment of Takagi Ophthalmological Clinic in Okawa City, Fukuoka Prefecture, in 1910. Thereafter multiple health and welfare facilities were established, including Takagi Hospital. In 1995, the International University of Health and Welfare (IUHW) was founded as Japan's first comprehensive university specializing in medical care and welfare, aspiring to train various medical and welfare professionals and improve their status. In addition to seven university hospitals in Tokyo, Chiba, Tochigi, and Shizuoka prefectures, the IHW Group also operates Sanno Hospital, Sanno Birth Center, and Sanno Medical Center, which offer highly specialized medical care coupled with warm and attentive services. The IHW Group also operates over 60 other hospitals and facilities, predominantly in Tokyo, Tochigi, and Fukuoka prefectures. All 15,000 staff members and 13,000 students share both the university's principles of "focusing on well-balanced individuals with a solid sense of humanity," "directing towards the attainment of global standard," "being strongly connected to and fully open to the community," and "building a society for mutual respect and support," and also our hospitals' and medical facilities' principle of "dignity and equality of life." These shared principles form our identity and over the years they have provided the basis for the various independent organizations of the Group to advance together in unity, sharing the same ideals.
