

INTERNATIONAL  
UNIVERSITY OF  
HEALTH AND WELFARE

# IHW Group

List of Facilities (2024.6)

# Group Overview

The IHW Group traces its origins to the establishment of Takagi Ophthalmological Clinic in Okawa City, Fukuoka Prefecture, in 1910. Thereafter multiple health and welfare facilities were established, including Takagi Hospital. In 1995, the International University of Health and Welfare (IUHW) was founded as Japan's first comprehensive university specializing in medical care and welfare, aspiring to train various medical and welfare professionals and improve their status. In addition to six university hospitals in Tokyo, Chiba, Tochigi, and Shizuoka prefectures, the IHW Group also operates Sanno Hospital, Sanno Birth Center, and Sanno Medical Center, which offer highly specialized medical care coupled with warm and attentive services. The IHW Group also operates around 60 other hospitals and facilities, predominantly in Tokyo, Tochigi, and Fukuoka prefectures. All 12,000 staff members and 12,000 students in our Group share both the university's principles of "focusing on well-balanced individuals with a solid sense of humanity," "directing towards the attainment of global standard," "being strongly connected to and fully open to the community," and "building a society for mutual respect and support," and also our hospitals' and medical facilities' principle of "dignity and equality of life." These shared principles form our identity and over the years they have provided the basis for the various independent organizations of the Group to advance together in unity, sharing the same ideals.

## Health Evaluation and Promotion Center - Cho Ray Hospital International University of Health and Welfare (HECI)

A health checkup facility with state-of-the-art Japanese medical technology was established in collaboration with Cho Ray Hospital. This was realized based on over 20 years of relationship and professional exchange between Cho Ray Hospital, one of the largest health care facilities in Vietnam, and

IUHW, Japan's first comprehensive university in the field of health and welfare.

Features include the followings:

1. high-quality health checkup services in a comfortable environment
2. state-of-the-art medical equipment
3. efficient and comprehensive platform for remote medical diagnostics

## WOODROFFE HOTEL

Located in the heart of the Gold Coast, WOODROFFE HOTEL features a stylish array of accommodation, contemporary facilities and personalized service.

Just minutes from the light rail, shopping centers, China Town, the Broadwater Parklands, cafes, and restaurants, the WOODROFFE is the perfect place for business or leisure.

Hotel Information:

1. All 103 rooms are simple and modern in design.
2. Customer support is available in English, Japanese, Chinese, and Korean.
3. The café serves breakfast, lunch, snacks, and drinks.
4. The conference room (up to 30 people) is suitable for business negotiations, seminar, standing parties, and etc.
