The International University of Health and Welfare (IUHW) was founded in 1995 with the objective of nurturing health and welfare specialists and raising their status. Since then, our highly specialized education has produced about 25,000 graduates. The features of our school are the affiliated/related health and welfare facilities, education by leading experts in their fields and the overseas network. We are proud to offer a great setting for clinical practice by having 5 affiliated hospitals as well as research centers for clinical medicine to back up our education, research and personnel, in addition to overseas network. It is also our unique and noticeable feature that two of our campuses, Ohtawara and Okawa, have many health and welfare facilities in or near the sites. In addition, the top figures in each field are involved in the teaching. Our graduates are highly regarded for the 100% employment rate and the top-level pass rate in national examinations.

IUHW Hospital in Tochigi has increased the number of beds by 55 by completing new hospital and research wards. In its vicinity, we have also opened an accommodation facility with 113 rooms, convenient for students under clinical practice, and a certified center for early childhood education and care equipped with a daycare facility for sick children, which is the first in the northern Tochigi area. Furthermore, by increasing the number of beds of the special nursing home, we have realized a base for comprehensive education and welfare from babies to the elderly. We will keep striving to offer specialized healthcare needed by the local community.

In 2017, IUHW School of Medicine was established in Narita Campus. There we practice unprecedentedly innovative medical education by teaching practical skills at our simulation center (one of the largest in the world), accepting 20 excellent international students each year, mainly from Asia, giving many lectures in English and conducting mandatory overseas clinical practice, among others. In the spring of 2020, we expect to open an affiliate hospital with 642 beds to this school of medicine in Narita. This IUHW Narita Hospital aims to become a leading medical hub in Asia and the world by welcoming patients from Japan and abroad at our advanced medical departments and centers including the Center for Preventative Medicine. It will provide services in several languages with amenities including faith-related facilities and food choices such as halal.

On the Tokyo Akasaka Campus, opened in April 2018, in addition to School of Psychology and Healthcare Management, we have IUHW Graduate School of Medicine, and Public Health, which will build an international academic hub as Japan’s largest comprehensive graduate school of health and welfare, together with the university.

The national Cho Ray Hospital in Vietnam and IUHW have closely interacted over the past 20 years. In fall 2018, together we opened a Japan-standard health checkup center. In cooperation with Mita Hospital, Sanno Hospital and the School of Medicine, radiological and pathological diagnoses are remotely double-checked to offer the top quality medical checkup in Vietnam.

We are about to celebrate our 25th anniversary, and we expect to newly open Department of Radiological Sciences in Narita Campus, and School of Pharmacy at Fukuoka in Okawa Campus in 2020. We will keep striving to nurture health and welfare specialists needed in and outside Japan by close cooperation among all the campuses, affiliated/related facilities and overseas network.
IUHW was founded in 1995 as the first comprehensive university of health and welfare in Japan to advance the social status of specialists in the field of health and welfare. Our goal is to train and educate future leaders in their respective fields, capable of responding to the advancement and specialization of health and welfare field with good judgment and intelligence. At the same time, we have been strengthening international relations and cooperation activities across the globe, especially with developing countries in Southeast Asia. Approximately 9,000 students currently study at 10 schools, 24 faculty and departments in 6 campuses located in Ohtawara City (Tochigi Prefecture), Narita City (Chiba Prefecture), Akasaka (Tokyo), Odawara City (Kanagawa Prefecture), and Fukuoka and Okawa Cities (Fukuoka Prefecture).
Message from the President

Kuni Ohtomo
MD, Ph.D.
President

Founded in 1995 in Ohtawara City in Tochigi Prefecture, IUHW is the first comprehensive university of health and welfare in Japan. In 2017, after more than ten years of planning we opened our School of Medicine, which marked the start of a second era for IUHW. Furthermore, in 2018 we marked the opening of the Tokyo Akasaka Campus in Minato City in Tokyo, which we aim to become a hub for lifelong education and community exchanges, serving as the home to the School of Psychology and Healthcare Management at Akasaka and also the expanded IUHW Graduate School, which has moved from its former location on the Tokyo Aoyama Campus. At the time of its establishment IUHW had one school and five departments, and since then we have expanded to 10 schools, 24 faculty and departments, in addition to a graduate school, spread over six campuses.

The founding principle of IUHW that we have followed since our establishment is “building a society with mutual respect and support”, which was advocated by our first President, Fujio Ohtani, who strove to protect human rights throughout his life. In accordance with that principle we have developed the educational environment so that our campuses also include health and welfare facilities for the elderly and disabled, giving students the opportunity to have direct contact with people who have special needs and thus nurture loving-kindness in their everyday experiences naturally.

The education we provide is designed to nurture medical professionals with advanced knowledge and technical skills, coupled with a rich sense of humanity. Accordingly, our faculty consists of pioneers in their respective fields and our trailblazing curriculum utilizes advanced educational tools. Furthermore, we emphasize on-site experience in the early years, with clinical training being conducted from an early stage in the first year of study at the University Hospitals and many other affiliated medical facilities which act as clinical research centers for medicine. In 2020 the IUHW Narita Hospital is scheduled to open in Narita City, Chiba Prefecture, which will further enhance our practical learning environment.

“Team care medicine” is indispensable in the medical and welfare fields today, where professionals from various specialties work together to provide the best treatment and care for patients. Taking full advantage of our university’s comprehensive structure and multiple departments that foster specialists in various fields, we implement “Inter-Professional Education,” an initiative unique to IUHW, by which we form teams that comprise members from various departments so that students can experience “team care medicine” for themselves. The establishment of the School of Medicine in 2017 and the most recent addition of the School of Psychology and Healthcare Management at Akasaka can add further medical and psychology-based specialist perspectives to our team-based work, making our education even more appropriate for clinical training.

I hope that students who aim to study at IUHW will take advantage of our outstanding faculty and fulfilling educational environment, and engage not only in study, but also in sports and volunteer work, and in the process become well-rounded individuals who can take a leading role in a broad range of areas in health and welfare, both in Japan and around the world.

Message from the Dean, IUHW Graduate School

Soichiro Miura
M.D., Ph.D.
Dean, IUHW Graduate School

Japan is increasingly becoming a super-aging society, and the proportion of elderly in its population is estimated to reach 33.4% in 2035. For this reason, it is predicted that there will be a dramatic shortage of the necessary human resources in the fields of medical care, welfare, and nursing care in the future.

Responding to such social needs, IUHW, as a university for fostering a variety of professionals in medical, health care and welfare fields, provides education for students who work to realize their goal of becoming future medical staff in a blessed educational environment. This education is given at a number of clinical educational facilities, including five attached hospitals and by excellent academic staff who are active as leaders at the forefront of health care in Japan.

Currently, approximately 25,000 of our graduates are playing a leading role as society transitions to a new era nationwide and shouldering heavy social responsibilities, whilst responding to the advancement and specialization of the medical, health care and welfare fields, with a high level of skills and knowledge and rich educational ability. With the establishment of the IUHW School of Medicine in 2017, which provides innovative medical education based on new concepts, I believe that our university will continue to fulfill an ever-greater role in the future.

Profile
Graduated from the University of Tokyo, School of Medicine. After study overseas at Washington State University and the University of Pittsburg in the United States, he was appointed Professor of Radiology, Medical Science Graduate Program, the University of Tokyo Graduate School. He specializes in radiodiagnosis and has contributed to developments in diagnostic imaging and interventional radiology using of CT and MRI, predominantly in the field of gastroenterology. He has served in various positions to date, including President of the 70th and 74th Annual Meeting of the Japan Radiological Society, and Head of the Radiology & Biomedical Engineering Program at the University of Tokyo Graduate School of Medicine. He is an Emeritus Professor at the University of Tokyo.

Profile
Graduated from Keio University, School of Medicine, Ph.D. in Medical Science. He was appointed President, National Defense Medical College. Emeritus Professor, National Defense Medical College, and Visiting Professor, Keio University, School of Medicine. He has served various positions such as Director of the Japanese Society of Gastroenterology, and Director of Japan Gastroenterological Endoscopy Society.
The Principles and Educational Goals of International University of Health and Welfare (IUHW)

Fundamental Principles of IUHW

University focused on well-balanced individuals with a solid sense of humanity
University strongly connected to and fully open to the community
University directed towards the attainment of global standard

Educational Principles of IUHW

Personality Development
Expertise
Inter-profession
Information Science and Technology
Internationality
Freedom of Thought
Innovative University Management

History of IUHW

1995 APR
Establishment of International University of Health and Welfare (Ohtawara City, Tochigi Prefecture)

AUG
Opening of Yufuin Seminar House and Arimy Yufu-kogen

2013 APR
School of Rehabilitation Sciences at Fukuoka renamed to School of Health Sciences at Fukuoka
Establishment of Department of Medical Technology and Sciences at Okawa Campus
Relocation of School of Nursing at Fukuoka to Seaside Momochi area in Sawara-ku, Fukuoka City

2015 JUN
Opening of Japanese Language Program at Ohtawara Campus

2016 APR
Establishment of School of Nursing/Health Sciences at Narita (Narita City, Chiba Prefecture)

2017 APR
SEP
Establishment of School of Medicine at Narita Campus
Kaken Hospital renamed to IUHW Ichikawa Hospital

2018 APR
Establishment of School of Psychology and Healthcare Management at Akasaka (Minato Ward, Tokyo)
Establishment of Graduate School of Medicine (Doctoral Program) and Graduate School of Public Health (Master’s Program)

2019 APR
Establishment of IUHW Japanese Language Program at Okawa Campus
Features of IUHW

Inter-Professional Education (IPE)

We offer “Team care medicine”, where different health and welfare specialists provide medical treatment and care to each patient.

With various types of health and welfare institutions, IUHW provides Inter-Professional Education (IPE) where students learn “Team care medicine”, indispensable in the field of health and welfare over the coming years.

The IPE consists of 4 steps. Practical training in the fourth year will be conducted at a wide range of IUHW group affiliated institutions, including 5 university hospitals. IUHW, as a comprehensive university, accepts students who aspire to become various types of medical specialists. It offers a unique curriculum where students can acquire “Team care medicine” through experience at the undergraduate level.

National Examination Pass Rates

The pass rate of national license examinations of IUHW students continues to show excellent levels over the past many years. Among 12 different license tests in the academic year 2018, IUHW has recorded outstanding pass rates and results in various fields, including Care Worker, Orthoptist, Physical/Occupational Therapists, Nurse and Pharmacist.

Employment

A wide range of job options will be available to students upon graduation, varying from hospitals, health and welfare institutes, medicine related companies, research institutes, etc. We assist students seeking employment opportunities by providing support, such as comprehensive guidance for job search at career support seminars and well-organized employment search engine systems. In academic year 2018, for 1,372 students seeking jobs, there were 95,791 job opportunities offered to our 4 campuses. Approximately 70 job opportunities were offered to a student and the rate of employment reaches almost 100% every year.

Various Scholarship Programs

Students will be chosen among Special Scholarship Exam and General Exam (primary) applicants with top scores. Tuition may even be cheaper than public universities. Up to 50% of the students receive scholarships, including university’s original scholarship programs as well as other financial support for students striving to work as health and welfare professionals in the future.
Future Developments

01 IUHW Narita Hospital will be established near Narita International Airport in April 2020.

IUHW Narita Hospital is scheduled to open in Spring 2020 as the university’s 6th affiliated hospital. Eight-story Hospital Ward with 642 beds, together with four-story Medical Checkup Ward featuring one of the largest health checkup centers in Japan, medical fitness facilities and swimming pools, are mostly completed. The hospital aims to become the world’s medical hub to provide advanced medicine to patients in and outside Japan. Furthermore it will play a role as a main hospital of IUHW School of Medicine, as well as a clinical training site for medical students.

02 School of Pharmacy in Okawa Campus and Department of Radiological Sciences in Narita Campus are scheduled to open

School of Pharmacy at Fukuoka is scheduled to establish in Okawa Campus with capacity of 120 students. Detailed pharmaceutical education will be conducted, collaborating with Ohtawara Campus, which has achieved the top pass rate in the national examination for pharmacists among Japan’s private universities. In addition, Department of Radiological Science will be added to School of Health Sciences at Narita, as the first educational facility in this field in Chiba Prefecture. By optimizing the university’s experience and knowledge, we will nurture professionals in these fields, in order for them to contribute in the community healthcare.

* Awaiting for government approval. The schedule may be subject to change.

03 New building available for public use in Tokyo Akasaka Campus will be completed in February 2020

The second-phase building (10 stories above the ground and an underground story) in Tokyo Akasaka Campus is scheduled to reach completion in February 2020. The features of the new complex, which is also available for public use, includes health and welfare facilities such as a medical check-up center, clinic, day-care facility and nursery school with sick kids care, as well as other facilities such as a restaurant and café.
IUHW group has more than 40 medical and welfare facilities including 5 university hospitals and Sanno Hospital in Tokyo. Those facilities provide valuable opportunities for clinical training for students to develop their expertise.

Students will experience “Team care medicine” in clinical practice and study advanced skills with state-of-the-art medical devices. This is one of the most unique features of IUHW as a university with various facilities for clinical training. In addition, as many graduates work at IUHW university hospitals and affiliated facilities, students can enjoy OJT from their seniors in a caring atmosphere.

**IUHW Hospital (Main Hospital)/Tochigi**
Number of beds: 408

**IUHW Mita Hospital/Tokyo**
Number of beds: 291

**IUHW Ichikawa Hospital/Chiba**
Number of beds: 260

**IUHW Atami Hospital/Shizuoka**
Number of beds: 269

**IUHW Shioya Hospital/Tochigi**
Number of beds: 240

**IUHW Narita Hospital/Chiba** (Scheduled to open in April 2020)

University hospital with international features will be established with 642 beds on 105,513m² architectural area. At the hospital, physicians and medical staff with a good command of foreign languages will be assigned. The hospital aims to be a global standard hub hospital by providing multiple language services, religious meals, spaces for religious purposes, excellent facilities, as well as cutting-edge medical services and equipment. Featuring centers including the Remote Diagnostic Center and the Center for International Research of Infectious Diseases will act as bases for collaboration with overseas universities and medical institutions.

Furthermore, the Center for Preventive Medicine featuring swimming pools, a gym and other facilities will provide a variety of health check-up options.

Ohtawara Campus

2600-1 Kitakanemaru, Ohtawara City, Tochigi 324-8501
Tel. +81-287-24-3200
E-mail nyushi@iuhw.ac.jp

Just 70 minutes from Tokyo on Tohoku Shinkansen, the closest train station to the campus is Nasushiobara. The vast campus of over 260,000m² has an on-site healthcare clinic and other medical facilities. Education, medical care and welfare are all provided on campus. This unique setting gives students frequent opportunities to care for the elderly and people with disabilities, nurturing a compassionate approach toward others which is essential for medical professionals.

Narita Campus

4-3 Kozunomori, Narita City, Chiba 286-8686
Tel. +81-476-20-7810
E-mail admission@iuhw.ac.jp

School of Nursing and School of Health Sciences were established in 2016, and School of Medicine was established in 2017. Conveniently located right in front of Kozunomori Station on Keisei Honsen line, students are able to commute from Tokyo and neighboring cities. The campus is set in a quiet, and natural environment with easy access to commercial facilities, such as shopping malls, restaurants and convenience stores.
Tokyo Akasaka Campus

4-1-26 Akasaka, Minato-ku, Tokyo 107-8402
Tel. +81-3-5574-3903
E-mail akasaka-nyushi@iuhw.ac.jp

Tokyo Akasaka Campus opened in April 2018 on the site of the former Akasaka Elementary School in Minato-ku, Tokyo. Conveniently located a three-minute walk from Tokyo Metro Akasaka-mitsuke Station, the area is home to various facilities that epitomize central Tokyo, including the National Diet Building, television stations and large-scale commercial complexes. The campus has facilities such as Akasaka Hall, Lifelong Learning Center and International Exchange Center, which can also be used by the local community. IUHW aims to become a hub for the community and for the international exchange and interaction.

Odawara Campus

1-2-25 Shiroyama, Odawara City, Kanagawa 250-8588
Tel. +81-465-21-0361
E-mail od-nyushi@iuhw.ac.jp

Odawara Campus is right beside Odawara Station, where several different railway lines are running in. With easy access from neighboring cities, the campus is only 35 minutes away from Tokyo Station by Shinkansen, making it convenient for students to commute from out of town. Odawara Campus is an ideal environment to study. Furthermore, Jonai school building opened in March 2017.
Fukuoka Campus

Fukuoka Campus is located at Seaside Momochi in central Fukuoka City, gateway to Asia. Close to Fukuoka Sanno Hospital, an IUHW-affiliated facility, hands-on medical training is provided directly from leading experts in their respective fields using state-of-the-art equipment. The campus provides an ideal environment for learning, with educational and cultural facilities nearby such as a library, museum, educational institutes, and TV station.

Okawa Campus

In the southern area of Fukuoka Prefecture, Okawa Campus in Okawa city flourishes with the gifts of nature from Ariake Sea and Chikugo River. The rich natural surrounding provides students an ideal environment to study. The campus is attached to Takagi Hospital, an IUHW-affiliated facility, students to learn from health and welfare experts with advanced knowledge and skills.
Faculty of Medicine

Fostering international medical professionals with an enrolment capacity of 140 students

First medical school in Japan to have a high ratio of foreign students (20 out of 140) in one grade. Of the 6 years of study, the first two will be taught mainly in English. From the 3rd year to graduation, classes will be focused on fostering clinical abilities. 90 weeks of clinical participation training will take place from the 4th grade at institutions, not only IUHW university hospitals, but other group institutions. All students will undergo over 4 weeks of clinical practice overseas in the final year of their study. To bring distinction as a comprehensive university of health and welfare, our curricula feature “Inter-Professional Education”, practice students from different schools gather to experience and actually get acquainted with “Team care medicine”.

Department of Pharmaceutical Sciences

We educate top-class medical professionals devoted to “Team care medicine”

Our program offers training not only at on-campus facilities, but also at IUHW hospitals and affiliated hospitals which provides students with great practical experience from clinical training in Year 5. These trainings prepare students with the flexibility to demonstrate their abilities in “Team care medicine” and enable them to become top-class pharmacists.

Department of Physical Therapy

We prepare rehabilitation professionals of the next generation with highest standard medical knowledge and skills

The job of physical therapists is to offer knowledge and skills in improving the QOL (quality of life) of patients with disabilities. The career path of physical therapists have expanded from health and welfare, emergency medicine, sports and various other fields. Our program enhances knowledge, skills and communication abilities, and train physical therapists with a caring heart.

- Physical Therapist

Work Settings
- Hospitals / Clinics
- Public offices such as health centers
- Rehabilitation centers
- Nursing homes / Elderly welfare facilities
- Medical equipment industry
- Health promoting centers
- Educational / Research institutions
We train experts who assist people with disabilities to participate in everyday life activities

Occupational therapists aim to assist people to enhance their ability and engage in a self-reliant social life. Effort is put into performing daily life activities the client needs or hopes for. Our program provides students with the expertise in becoming specialists in the body and soul through clinical training.

National License
* Occupational Therapist

Work Settings
* Hospitals / Clinics
* Public offices such as health centers
* Rehabilitation centers
* Nursing homes / Elderly welfare facilities
* Nurseries / Children’s facilities
* Special schools for children with disabilities

We prepare students of the next generation to diagnose and treat biological and environmental speech/hearing-related problems and swallowing disorders

Speech-Hearing therapists provide professional assistance using their specialized knowledge and skills to clients with disabilities in daily activities such as communication and eating. Our program offers top-quality rehabilitation skills and we aim to educate specialists with high professionalism and a service-oriented approach.

National License
* Speech Therapist

Work Settings
* Hospitals / Clinics
* Public offices such as welfare centers and rehabilitation centers
* Nursing homes / Elderly welfare facilities
* Special support education schools / facilities for the disabled
* Research scientists in the field of speech and language science / communication disorders
Department of **Orthoptics and Visual Sciences**

We provide latest ophthalmic medical treatment using professional knowledge and skills

As ophthalmic medicine becomes highly advanced, training experts in this field also becomes crucial. Our program focuses on clinical training which not only refines individual skills but enriches professionalism through collaborative work in “Team care medicine”. Students should aim to become comprehensive healthcare professionals, expert orthoptists who can convey the joy of “seeing.”

Department of **Radiological Sciences**

We train our radiological technologists systematically from basic to highly advanced technology which enables them to fully promote advanced medicine

The department uses educational devices such as medical image diagnosis apparatus, radiation therapy equipment and various other equipment which are essential in the clinical scene. Our program offers clinical training at the 5 IUHW university hospitals and over 40 facilities, differentiating our university from other schools.

We train professionals able to comprehensively support health and welfare

Japan has one of the longest life expectancies in the world. In order to assist people in living quality life, experts with knowledge both on health and welfare are in high demand. Additionally, to play central roles in practical health and welfare, management skills are also essential. Although there are many colleges and vocational schools focusing on social welfare and medical office work skills, our program trains professionals with knowledge in three different but related fields: medicine, welfare and management.

Department of Social Services and Healthcare Management

We educate medical technologists of the next generation

Medical technologists play major roles in the decision-making of the treatment method for patients, conducting various examinations such as electrocardiograms, brain waves, blood tests and others. Our program focuses on training experts capable of adapting to the diversification of medical services and advancement of examination methods, equipping them with both basic information and up-to-date technology essential in the present medical scene.

National Licenses
- Certified Care Worker
- Certified Social Worker
- Psychiatric Social Worker

Work Settings

Fostering specialists in mental health care which is important in a stressful society by education that emphasizes in “team-based clinical” approach

Mental health care is becoming increasingly important in the workplace, at schools, in the home and in medical institutions. Leveraging our special characteristics as a comprehensive health and welfare university, the Department of Psychology trains psychologists with strong clinical skills, who are capable of playing a central role in the mental health care through the education that focuses on a team-based clinical approach to counseling in cooperation with other specialist fields.

Active International Exchange

**Overseas Partner Universities and Institutions**

IUHW has signed partnership agreements with 41 institutions in 23 countries/regions. (as of March 2019)

Department of International Relations and International Exchange Center of IUHW plan and operate international projects, and collect relevant overseas information. We also manage a variety of international exchange activities such as accepting short-term trainees from China and other countries, and provide overseas training courses for IUHW students.

</table>
IUHW School of Medicine Special Scholarship Student Program for Overseas Medical Students

IUHW has a scholarship program for international students who pursue a career in medicine. We offer students who had an outstanding score on entrance examination the full amount of 6 year’s tuition fee through to graduation, as well as an enrollment fee, material fees and living expenses. We have signed a memorandum of understanding with the governments and universities in six countries of Vietnam, Mongolia, Myanmar, Indonesia, Laos, and Cambodia. The purpose of this program is for scholarship students to gain Japanese medical license, and after having clinical experience in the affiliated facilities, to return their home countries and contribute in the development of health and medical care.

IUHW Scholarship Program

IUHW established its own scholarship program for students from Asian countries in order to contribute in the development of human resources who will become leaders in medical and welfare fields. Strongly supported by the “Asia-Pacific Ladies Friendship Society,” in selecting international students to be awarded scholarships, the program covers the total amount of tuition and other expenses. International students in the program are obliged to return home as soon as their graduation and take on leadership positions in their relevant fields. We have also signed a memorandum of understanding directly with Mongolian government and established another scholarship program to foster students who will play an active role in the field of medical, health and welfare in Mongolia. The scholarship is granted to up to 10 students who are qualified public selections in Mongolia for five years from fiscal year 2019. Furthermore, we have a scholarship program for international students who eagerly seek a career in the field of nursing care.

Academic Exchange Agreements

For international students, IUHW has set up a comfortable study environment such as scholarship programs, and Japanese Language Program (JLP) for pre-enrollment students to study Japanese language. So far we have accepted total 450 students (as of April 1, 2019). There are quite many graduates who actively play various roles in medical and welfare fields in Japan as well as in their home country.

Telepathology and Telediagnosis Projects

Since fiscal year 2011, under the auspices of the international medical alliance project promoted by the Ministry of Economy, Trade and Industry (METI), IUHW successfully conducted the “Remote Pathology and Diagnostic Imaging Project” in China and Vietnam. In addition, we will also carry out a “Practical Investigation Project to Establish a Remote Image Diagnosis and Training Center” in Vietnam and Myanmar. These projects combine advanced Japanese diagnostic technology with advanced test equipment technology and ICT. and are developed as a remote diagnostic system in countries lacking specialists in diagnostic imaging and pathology. We will continue to work on technical exchanges and medical support for international cooperation.

Establishment of health checkup centers in Vietnam

In October 2018, IUHW opened a Japanese style of health checkup center, “Health Evaluation and Promotion Center - Cho Ray Hospital International University of Health and Welfare (HECI),” in Ho chi Minh Cty in collaboration with the national Cho Ray Hospital, the first of its kind in Vietnam. The facility features high standard of medical checkup services our group has to offer, with state-of-the-art equipment and relaxing environment. Furthermore, in January 2019, IUHW and one of our affiliated hospitals, Sanno Hospital, concluded an agreement with Vin group, who operates general hospitals in Vietnam, establishing “Vinmec-Sanno Premium Medical Checkup Center,” and providing medical checkup services for 10 years until 2029.

Promotion of Overseas Medical Cooperation

IUHW actively promotes international medical cooperation to embody one of the fundamental principles, “University directed towards the attainment of global standard.” As an example, IUHW donated rehabilitation equipment to the National Rehabilitation Hospital in Yangon, Myanmar in 2017. A memorandum of understanding on human resource development in the field of rehabilitation was signed with the Ministry of Health and Sports in Myanmar and “IUHW Rehabilitation Training Center” was established in the hospital. In addition, IUHW, together with Sanno Hospital, concluded tripartite academic agreement with Hung Vuong Hospital in Vietnam, and promote the cooperation of (1) Exchange of experts and researchers, (2) Student training at Hung Vuong hospital, and (3) research cooperation and academic conferences.
General Education Subjects: Overseas Training Program

After pre-visit courses in Japan, students travel and study different cultures, medical health care and welfare at overseas partner’s medical institutions, welfare facilities, universities and other relevant facilities for approximately two weeks during either summer or winter holidays. Under the guidance of local medical staff, they acquire valuable experiences by being involved in actual medical settings in foreign countries and regions. During AY2018, 819 students trained at actual international medical, health and welfare facilities in various countries such as Australia, Korea and Vietnam.

819 Students went overseas to experience medical welfare on the scene in the academic year of 2018.

International Students Studying at the IUHW

Ms. Kim Hyejung
From Republic of Korea
4th year student in Department of Nursing, Narita Campus

I chose to study nursing in Japan, where I can acquire the highest medical technology to achieve my goal, to play active roles vigorously in cases of disasters and in emergencies. I am indebted to the University from the very beginning, the time I made arrangements for my accommodation and even now, I am courteously supported through costs of living. I aspire to become a cosmopolitan nurse, which I will make come true by endeavor of deep engagement in both study and work.

Ms. Guo Wenyue
From People’s Republic of China
4th year student in Department of Medical Technology, Okawa Campus

What attracted me the most about IUHW are the facts that the faculty is composed of globally renowned experts who are active in the very front lines and the curriculum using state-of-the-art medical equipment. The people of Japan, being so kind, is another factor of my attraction. I dream of becoming a medical technician, with strong focuses on clinical laboratory pathology, clinical laboratory immunology and clinical laboratory physiology. In the future, I wish to support Chinese patients landing to Japan for medical examination and to create a bridge between Japan and China.
International Students

Features

1. University to foster health, medical, and welfare professionals

2. One of the few universities with entrance exam intended for international students in the health, medical, and welfare fields

3. A career path where students can attain national medical qualifications and then work in Japan

4. Various supporting system for international students

- Undergraduate students with student visa can receive waivers of up to half of their tuition and course fees (other fees apply) under certain conditions. To some extent, the waiver of school expenses for graduate students is also available.
- International students with IUHW Bachelor’s Degree who intend to study further at IUHW Graduate School are to be remitted all of their entrance fee.
- Several private agencies and local autonomous bodies offer various types of scholarships for international students.
- When students join the National Health Insurance, 70% of their medical bills are covered by the insurance. In addition, the IUHW Education mutual aid can support the students by covering the rest of the 30%, which means there is no need for international students to worry about medical expenses. For that privilege, each undergraduate pays 30,000 yen per year to the mutual aid, which is compulsory. However it is optional for graduate students.
- Student Dormitory (conditions of use apply)
- For details, please consult the school staff responsible for this matter.

Special Entrance Examination for International Students

Screening: Every applicant is required to take the Examination for Japanese University Admission for International Students (EJU), and essay written in Japanese. Each applicant will be interviewed by faculty members.

Qualification:

- Non-Japanese citizen and age 18 or over
- 12 years of education outside Japan, and with student visa to stay in Japan
- Japanese language proficiency to be able to attend classes taught in Japanese

The above requirements will vary. For the latest and precise information, please contact the admissions office.

Campus Calendar

The school year begins in April, and academic year consists of two semesters.

- April: Entrance ceremony / Orientation
- May: Founders’ Day (Holiday for IUHW) Sports Day
- July: Final examinations for the first semester
- August: Completion of the first semester (at the end of the month)
- Summer vacation
- September: Beginning of the second semester (at the end of the month)
- October: Exchange party / School Festival
- December: Christmas Party / Winter vacation
- January: Final Examinations for the second semester
- February: Completion of the second semester (at the end of the month)
- March: Graduation ceremony

National/Region Origin and Enrollment ratio of International Students

- China: 10%
- Mongolia: 3%
- Vietnam: 3%
- Myanmar: 3%
- Bangladesh: 3%
- South Korea: 3%
- Indonesia: 4%
- Cambodia: 1%
- Taiwan: 3%
- U.S.A.: 3%
- Nepal: 3%
- Australia: 3%
- Others: 1%

*AY2018
Japanese Language Program (JLP)

JLP is designed for people whose native language is not Japanese to help them acquire Japanese language proficiency, and deepen their understanding of the situation, culture, and other aspects of Japan. Experienced, dedicated staff in charge of international students are available to assist them with all of their academic and personal needs, including living arrangements in Japan, JLP studies, and advancement to universities and other schools. JLP students have access to the same facilities as IUHW students. Furthermore, our program allows students to take some of the courses offered at IUHW and graduate schools. With networking events also available for international students, JLP offers opportunities for students to lead an enriching campus life.

Features

1. Customized Academic Guidance
   All classes have homeroom faculty. Experienced faculty provide meticulous guidance.

2. Extensive Supports
   Extensive supports are offered for students’ academic and personal needs.

3. Tailored Guidance on Post-completion Plans
   Various supports are available to make students’ post-completion plans.

4. Japanese Language Program by University Specializing in Health and Welfare

Credited Auditor System

Students who satisfy the Japanese language proficiency and other requirements may take some courses that are offered at IUHW undergraduate or graduate schools. In addition, tuition will be waived for up to three courses per semester. If students qualify for credit under this program, in some cases the credit will be counted if and when they enroll in IUHW undergraduate and graduate schools.

Admission Requirements

- Applicant should be a non-native speaker of Japanese and be able to obtain a Certificate of Eligibility for resident status.
- Applicant must have completed at least 12 years of basic education in a country outside Japan, or have the equivalent education (this condition should be met before entering JLP).

*For more information on applying, see the Application Guideline.

Curriculum

- One-year program*: The university will confer certificates of completion to students whose completion of the program was approved.
- Spring semester (April-September) and Fall semester (October-March). Applications are accepted twice a year.
- Length of courses in a semester: 18 weeks

*Students wishing to continue their studies can enroll up to two years.

Volunteer Activities

IUHW encourages students to participate in volunteer activities, by sharing one’s time and talent, by communicating with others which are required of medical and welfare service professionals.

In the university, there are about 30 active volunteer groups.

Volunteer Activities at Medical and Welfare Facilities on Campus

Students interact with facility users at the medical and welfare facilities on campus.

Volunteer Activities at Hospitals

Students engage in helping outpatients, assisting the hospital staff, and cleaning at the IUHW affiliated hospitals.

International Volunteer Activities

Students engage in activities related to international health and international cooperation.

IUHW Volunteer Center (at Ohtawara Campus)

The Volunteer Center supports students who would like to participate in these volunteer activities. The Center also plans and carries out lectures by volunteers active in Tochigi Prefecture and events to promote exchanges with students from other universities.
The Graduate School at International University of Health and Welfare offers programs for scholars for further mastery as researchers and expert medical partners. The programs are set up and scheduled so that students can learn while working full-time or even after a long interval.

**History**

The Graduate School of IUHW aims to foster health and welfare researchers, educators and experts to meet the needs of the 21st century. It opens its doors to those who want to research and investigate further while still working full-time.

1999  Establishment of MS Program in Health Sciences
2001  Establishment of PhD Program in Health Sciences and MA Program in Health and Welfare, and Health Service Management
2004 MAR  First year to grant doctoral degrees—the completion of the entire educational program at IUHW
2005  Establishment of Departments of Assistive Cytogenic Reproduction* and Health and Welfare Journalism*
2006  Establishment of Departments of Midwifery and Orthoptics
2007  Establishment of MS Program in Clinical Psychology
2008  Establishment of Department courses in Radiological Technology for Cancer Treatment, Certified Pharmacist for Cancer Medicinal Treatment, and Technical Cancer Registry (Supported by the Ministry of Education and Science "Training Scheme for Cancer Treatment Professionals")
2009  Establishment of Department of Pharmaceutical Sciences and MS program for Biosis-pharmacy
2010  Establishment of MA Program of Business Administration in Healthcare (m-MBA)
2011  Establishment of PhD Program in Pharmaceutical Sciences Establishment of Department of Nurse Practitioner
2015  Establishment of Departments of Education and Management in Health and Welfare
2016  Establishment of Departments of Medical Laboratory Science
2017  Establishment of Departments of Medical Interpreter and International Medical Management
2018  Establishment of PhD Program in Medicine Establishment of MPH Program in Public Health

*Entirely new Department in Japan

**Distance Learning**

A tele-communication system has been installed on the 7 campuses through which classes and seminars are conducted, inviting lively discussion between teachers and students. This distance learning system can offer classes simultaneously to every campus.

**Campuses and Curricula for scholars to learn and research while working**

More and more health and welfare specialists want to study at graduate school to gain advanced knowledge and skills while working. As the number is increasing year by year, our graduate school has set up 7 campuses in Ohtawara, Narita, Akasaka in Tokyo, Odawara, Atami, Fukuoka, and Okawa. Most classes are scheduled in the evenings and on Saturdays. In addition, our MS program for Clinical Psychology has been accredited by the Japan Association of Clinical Psychologists.
